SOFTWARE PROJECTS – GitHub: https://github.com/Tgall1999

Personal Website June 2020
- Utilized online resources to teach myself HTML, CSS, JavaScript, and React.js.
- Created a professional and reactive website where I display my resume and experiment with new web development ideas.

Snake Game December 2019
- Developed an interactive snake game using C++ utilizing multiple classes, graphical libraries, and user-defined functions
- Enabled users to play against each other in real time and compete for the high score.

Stock Market Simulator April 2019
- Developed an algorithm that predicted a stock's closing price with higher accuracy than some professional algorithms.

Maze Game May 2019
- Utilized Verilog to create virtual hardware on an Altera Board to run an interactive maze game real time user input.

Library Catalog App December 2017
- Developed a library catalog app that can run on Android or iOS.
- Tested the app in the school's library with real books and students.

ENGINEERING EXPERIENCE

KnowYourVote.io Washington, DC / Virtual
Software Developer Intern March 2020-Present
- Utilized React.js to build professional quality webpages for the site's launch. Site: https://www.knowyourvote.io/
- Collaborated with other developer Interns to complete Quality Assurance checks to ensure professional quality work.
- Developed various Python scripts to collect policy data on 1000+ congressional and gubernatorial candidates.

US Department of Homeland Security, Cybersecurity and Infrastructure Security Agency Washington, DC / Virtual
